

INVISALIGN

Ready to start your journey to a straighter smile?

What are the benefits of a straight smile?

Smile more confidently: *if you've spent years hating the way your teeth look when you smile, orthodontics can be the answer to transform your teeth without damaging them.*

They are better for your oral health: *Straight teeth are easier to clean since there are no crooked or overlapping areas where plaque and food particles can get trapped. This reduces the risk of tooth decay, gum disease, and other oral health issues.*

Enhanced bite function: *Misaligned teeth can affect the way you bite and chew, potentially causing discomfort and difficulty while eating. Straightening teeth can help improve bite alignment, making eating easier and more comfortable.*

Reduced risk of dental injuries: *Protruding or misaligned teeth are more susceptible to chipping, cracking, or fracturing during accidents or sports activities. Straightening teeth can help minimise the risk of dental injuries by properly aligning and protecting them.*

Long-term oral health benefits: *By correcting misalignments and malocclusions, straight teeth can prevent excessive tooth wear, jaw disorders, and even temporomandibular joint (TMJ) problems in the long run.*

—★★★★★—

"The staff are very friendly and professional, you can tell they enjoy their jobs and patient interaction."

—★★★★★—

"Genuinely the best experience when visiting a dentist"

—★★★★★—

"Fantastic, very helpful and polite staff from receptionist to dental care. I wish I had met them years ago."

—★★★★★—

"From a lovely warm welcome as I walked in, to a friendly, courteous and professional service."

—★★★★★—

Why choose Invisalign?

Invisalign are the market leaders on clear aligners and offers the most advanced aligner system in the world with their patented SmartTrack™ material which is more comfortable and offers a better fit to your teeth than other cheaper alternatives. Invisalign offers a discreet way of moving your teeth as an alternative to traditional fixed metal braces, with no wires or brackets to irritate your gums or break. You can remove them when eating, meaning you can still enjoy your favourite foods.

How does it work?

Your Invisalign dentist will create a unique, digital treatment plan (Clincheck) that maps out the exact movements of your teeth. A series of Invisalign® clear aligners are then designed to apply gentle pressure to the right teeth at the right time based on your plan. We'll be with you every step of the way to monitor your progress throughout and ensure your aligners fit correctly.

How long does it take?

Invisalign® clear aligners can be used to straighten minor to complex teeth misalignment. The length of treatment depends on the complexity of your case and will be discussed with you at your consultation. For most patients they will feel a difference after three months, and results are usually noticeable after six months.

How much does it cost?

The cost of your Invisalign depends on the complexity of your case and number of teeth requiring treatment. Treatment can start from as little as £2024 to £4840. We offer flexible payment plans including 12 months interest free to help spread the cost of your treatment.

Interested in a Payment plan?

Applying for a loan to cover your treatment costs has never been easier. Visit our website and you'll get an answer straight away.

Available for many treatments and for up to £30,000. Credit decisions will be subject to your individual circumstances. You must be over 18 and earn an income to apply.

WOULD YOU LIKE A CONSULTATION?

A consultation is a comprehensive 30 minute check-up of your suitability for treatment, assess your oral health, including x-rays clinical photographs and a full orthodontic review. We'll then take a digital 3D scan of your teeth and photos to help map out a plan of how your teeth can be moved. The consultation is £66 and requires a £30 deposit.

Why choose Silk Dental

- 🦷 *Free tooth whitening, worth £450 to add the finishing touch to your new smile.*
