

VENEERS

Your dream smile awaits

What are porcelain veneers?

Veneers are thin shells of porcelain that fit over your existing teeth. They are commonly used to conceal staining, gaps, alignment problems and chipped teeth. In addition, modern techniques mean that the underlying teeth require minimal preparation, preserving the natural tooth structure as much as possible. Porcelain veneers are highly durable and stain-resistant, providing a long-lasting solution for achieving a natural-looking smile.

What can veneers help to fix?

Veneers will conceal any imperfections and can be matched to your existing tooth colour or created in a lighter shade to give the appearance of whiter teeth. Patients often turn to veneers to fix the "social six", which are the six top front teeth visible when you smile. Improving these teeth can drastically improve your smile.

What's involved with a veneer restoration?

This treatment requires at least two visits. During the first visit, your teeth will be prepared as per your bespoke treatment plan, to make room for the porcelain shells. We then take a 3d digital scan of your teeth to provide our highly skilled technicians with all the information they need to accurately construct the restoration. Your teeth will be temporised at this stage to ensure comfort and maintain your smile in the interim. After two weeks, you will return to the Dental Practice to have your custom veneers fitted. They are fixed in place with a special dental cement, ensuring a long lasting and effective restoration. Once in place, porcelain veneers can blend seamlessly with the surrounding teeth, creating a uniform and attractive smile.

BEFORE & AFTER

BEFORE & AFTER

Read all our patient's reviews on Google

I recently had 5 porcelain veneers fitted to replace failing teeth. They were all fitted perfectly. Very pleased with end results and would not hesitate to recommend Silk Dental.

—★★★★★—

I can really recommend Silk Dental, they are really helpful and have been really professional in helping me with my dental issues

—★★★★★—

Great service from Silk Dentist. Very clear communication about what is needed, the options, timescales. Pricing clear. Real sense of customer service throughout. Always on time too. Came recommended by a friend and would absolutely recommend on for others.

—★★★★★—

Really polite friendly people. Brilliant dentist. Very professional. I've had everything from check-ups to new veneers. Thank you Hassan, Tracey and the team.

—★★★★★—

Made to feel very relaxed. Treatment was well explained to me and couldn't be happier with the service, thank you

What are the advantages of veneers?

Cosmetic Enhancement | Veneers can be used to improve the appearance of teeth that are discolored, stained, or have other aesthetic imperfections.

Correction of Irregularities | Veneers can correct minor dental imperfections such as chipped, cracked, unevenly shaped teeth, or small gaps.

Minimally Invasive | Compared to some other cosmetic procedures, veneers require minimal tooth structure removal.

Customisation | Veneers are custom-made to match the colour, shape, and size of your natural teeth.

Durability | Porcelain veneers are highly durable and can last for many years with proper care. They are resistant to stains and do not discolour easily.

Quick Results | The process typically takes only a few dental visits, and the results are often immediate.

Natural Appearance | Veneers can look very natural, and it can be difficult for others to distinguish them from your natural teeth.

Stability | Veneers can help stabilise and protect teeth with minor damage or wear, preventing further deterioration.

However, veneers may not be suitable for everyone. A thorough evaluation by a dentist is necessary. Additionally, veneers are typically a cosmetic procedure, and may not address underlying dental health issues, such as decay or gum disease, which would need to be treated separately.

FINANCE CALCULATOR

Below is an example of the monthly repayments you would be making for 4 veneers based on a finance amount of £2,600:

12 MONTHS

£ 216.66

Per Month
(0% APR)

2 YEARS

£ 118.41

Per Month
(9.9% APR)

5 YEARS

£ 54.14

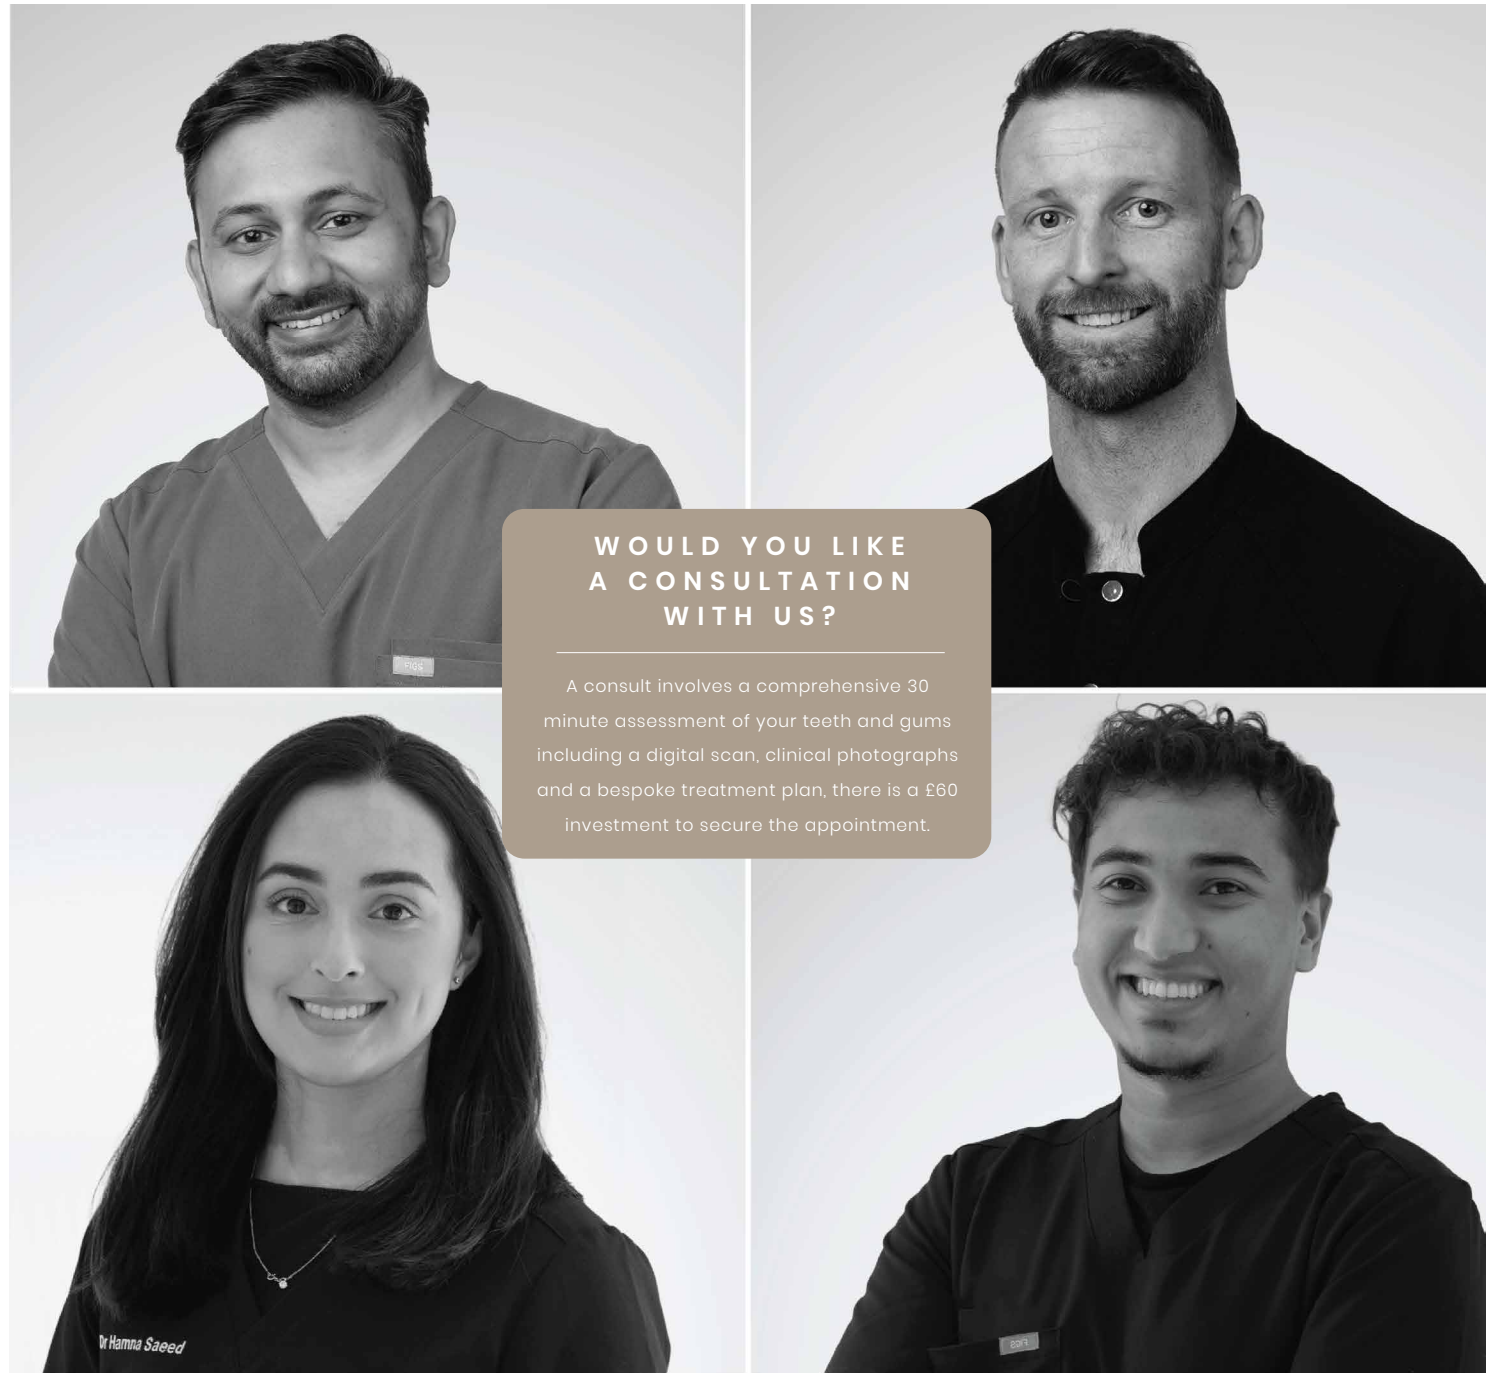

Per Month
(9.9% APR)

**Note that loans cannot be for more than your treatment cost*
