

WELCOME TO
SILK DENTAL

Welcome to Silk Dental

A very warm welcome to Silk Dental Practice and thank you for choosing us for your dental care.

We're delighted to have you as part of our patient community. Whether you're visiting for a routine dental health check, cosmetic treatment, or more complex care, our team is here to make sure your experience is comfortable, positive and tailored to your individual needs.

At Silk Dental, we pride ourselves on delivering high-quality, ethical dentistry in a calm and friendly environment. Our approach is based on clinical excellence, transparency and genuine care — with a strong focus on prevention and long-term oral health.

This welcome booklet is designed to help you get to know us a little better, understand the services we offer, and feel confident about what to expect at your appointments.

If you ever have any questions, concerns, or feedback, our friendly team is always happy to help.

We look forward to caring for your smile and welcome to the Silk Dental family.

Warm regards,

The Team at Silk Dental

ABOUT US

*Welcome to Silk Dental,
Dentist in Macclesfield*

We are a friendly team of dental professionals, dedicated to providing the essential care you and your family needs for long-lasting beautiful smiles and excellent oral health. We believe in listening to your expectations and concerns, offering personal, detailed patient consultations and providing a treatment plan that works for you and your dream results.

At Silk Dental, we consider your desires and preferences first when planning the best treatment for you. For a beautifully straight smile, we offer discreet Invisalign treatment, virtually invisible and designed to fit seamlessly into your everyday life. If you are looking to replace one or more missing teeth, we can discuss how dental implants or All-on-4 treatment can boost your confidence and leave you proud to show off your smile again.

Prioritising your Comfort

We pride ourselves on going above and beyond to cater to your needs, whether you require emergency dental care, are planning multiple appointments to makeover your smile or simply need to schedule your routine appointments. We strive to ensure our welcoming dental clinic has a relaxed, friendly atmosphere, helping you to feel at ease throughout your visit.

We offer a range of treatment with our experienced clinical team, please read further to find out a little bit more about what we offer.

GENERAL DENTISTRY

General dentistry focuses on maintaining and improving everyday oral health through routine care, early diagnosis, and preventative treatment.

Silk Dental Practice offers comprehensive general dentistry to keep your teeth, gums, and mouth healthy for life. From routine check-ups to problem tooth treatments, our experienced team delivers gentle, personalised care with a focus on prevention and tailored advice.

General Dental Services

- Routine dental health reviews (examinations)
- Hygiene services
- Fillings
- Crowns, bridges, and inlays
- Root canal treatment
- Extractions
- Dentures and repairs
- Preventative sealants and fluoride treatments

Your New Patient Examination: What to Expect

Your first visit is all about getting to know you and your oral health needs. During your comprehensive new patient examination, we will:

- Review your medical and dental history
 - Take any necessary X-rays
 - Take a digital scan of your teeth
 - Perform a full oral health assessment
 - Check the health of your teeth, gums, jaw joints, and soft tissues
 - Screen for signs of oral cancer
 - Discuss any concerns or symptoms you may have
 - Provide tailored advice on brushing, diet, and prevention
- Outline any recommended treatments and provide a clear treatment plan*

You'll also have plenty of time to ask questions and we'll make sure you leave with a clear understanding of your oral health and your options.

We're committed to helping you feel confident, informed and cared for – from your very first visit.

DENTAL HYGIENE

Our dental hygiene team is here to help you take care of your oral health. Visit the hygienist every 3-6 months to avoid plaque and tartar buildup and take control of gum disease. Maintaining good oral hygiene helps prevent gum disease and ensures the longevity of your dental restorations and teeth.

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

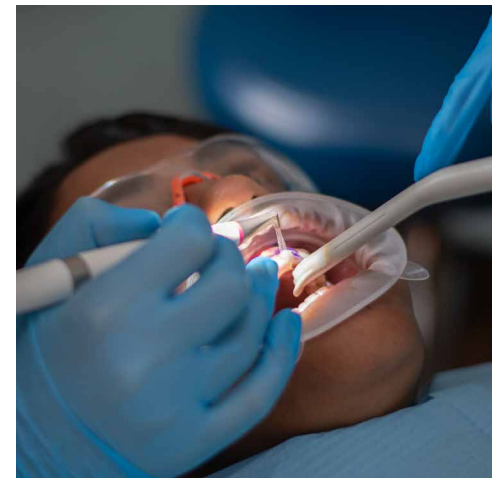

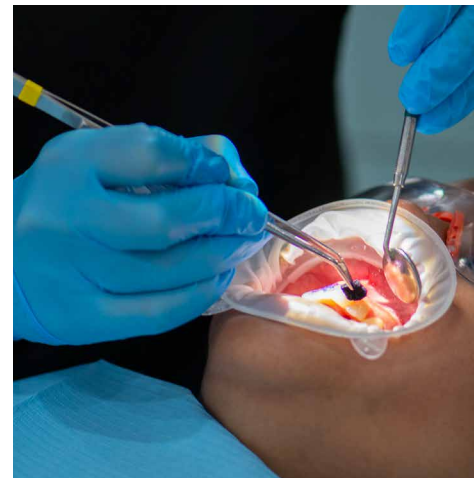

At our practice, we are committed to providing the highest standard of dental care and our hygiene services are no exception. We are proud to offer Guided Biofilm Therapy (GBT), an innovative and patient-friendly approach to dental cleaning that sets a new benchmark in oral health maintenance.

What is Guided Biofilm Therapy?

Guided Biofilm Therapy is a state-of-the-art dental cleaning method that focuses on the effective removal of biofilm—a sticky layer of bacteria that forms on teeth and gums. If left untreated, biofilm can lead to gum disease, tooth decay, and bad breath. GBT utilises advanced technology to detect and eliminate biofilm more thoroughly and comfortably than traditional cleaning methods.

What is Guided Biofilm Therapy?

Effective Gum Disease Management | *By targeting and removing biofilm, GBT helps in preventing and managing gum disease, promoting healthier gums.*

[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

Enhanced Patient Comfort | *GBT is minimally invasive and gentle, reducing discomfort and sensitivity often associated with traditional cleaning with an ultrasonic.*

Comprehensive Stain Removal | *The advanced air polishing technique effectively removes stains caused by coffee, tea, and other substances, resulting in a brighter smile.*

Improved Oral Health | *Regular GBT sessions contribute to better overall oral health by preventing cavities and maintaining the integrity of dental restorations.*

We believe that GBT represents the future of dental hygiene, offering a more comfortable and effective cleaning experience. Our dedicated team is here to ensure that you receive the best possible care tailored to your individual needs.

DENTAL IMPLANTS

Dental implants are a great way to replace missing teeth with something that looks and feel just like real thing. Say goodbye to gaps and hello to a beautiful, natural-looking smile!

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

What are Dental Implants?

Dental implants are a modern and effective solution for replacing missing teeth, designed to look, feel and function like your natural teeth. They provide a permanent foundation for fixed or removable replacement teeth, offering a comfortable and durable alternative to traditional dentures or bridges.

Natural Appearance and Comfort | *Implants are designed to look and feel like your own teeth, enhancing your smile and confidence.*

Improved Oral Health | *Unlike traditional bridges, dental implants do not require reducing adjacent teeth, preserving more of your natural tooth structure.*

Durability | *With proper care, implants are very durable and can last many years, often a lifetime.*

SEDATION

Nervous about treatment or just want a long treatment to pass by quickly? Sedation might be just the solution for you.

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

At our practice, we prioritise your comfort and well-being. We understand that dental visits can be daunting for some, which is why we offer Intravenous (IV) Sedation, a safe and effective method to help you relax during your dental treatments.

What is IV Sedation?

IV Sedation involves administering a sedative medication directly into your bloodstream through a cannula, typically placed in your arm or hand. This method allows you to enter a state of deep relaxation while remaining conscious and responsive. Many patients report feeling drowsy and having little to no memory of the procedure afterward.

Benefits of IV Sedation

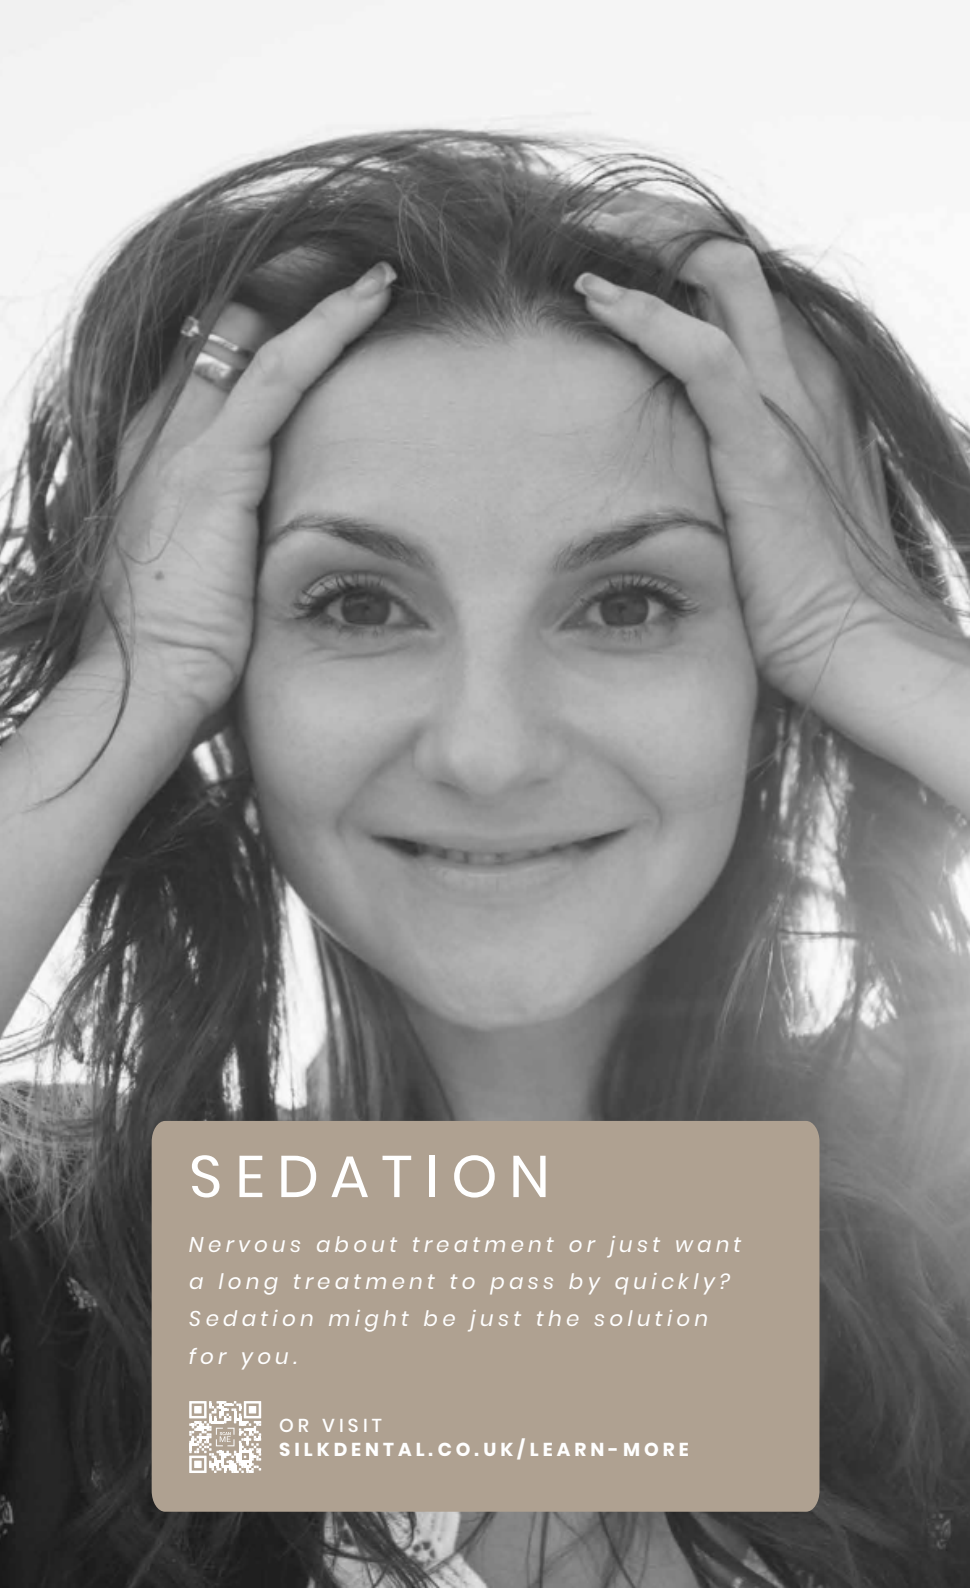

Rapid Onset and Adjustable Levels | *The sedative takes effect quickly, and our dental team can adjust the sedation level throughout the procedure to ensure your comfort.*

Anxiety Reduction | *IV Sedation is particularly beneficial for patients with dental anxiety, helping to alleviate fear and stress associated with dental visits.*

Enhanced Comfort | *This sedation method minimises discomfort during procedures, making it ideal for patients with a sensitive gag reflex or those undergoing complex treatments.*

SEDATION

Nervous about treatment or just want a long treatment to pass by quickly? Sedation might be just the solution for you.

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

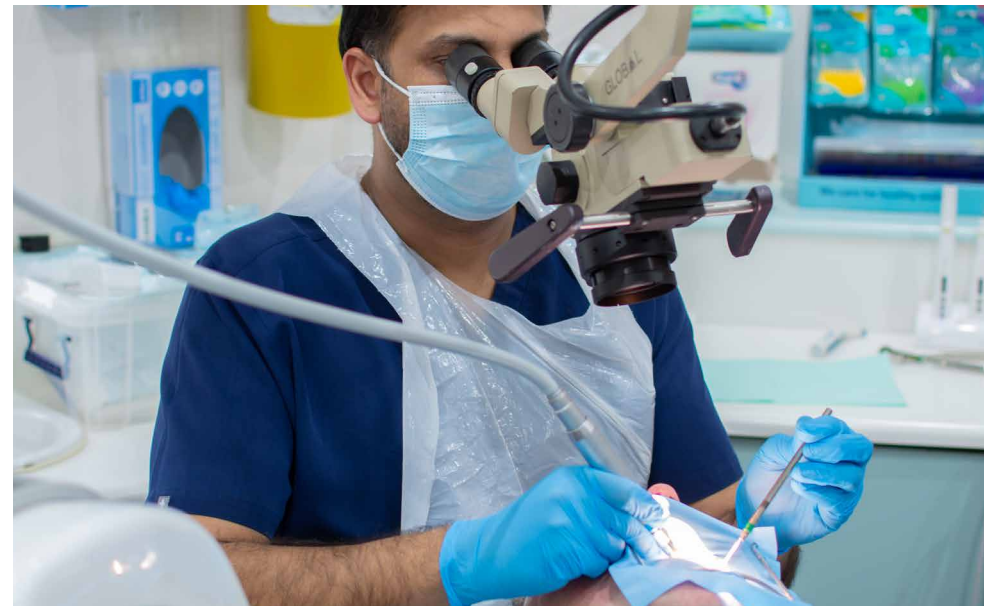

Efficiency | *With you in a relaxed state, our dental professionals can often complete multiple procedures in a single visit, saving you time and reducing the number of appointments needed.*

Is IV Sedation Right for You?

IV Sedation is suitable for patients who:

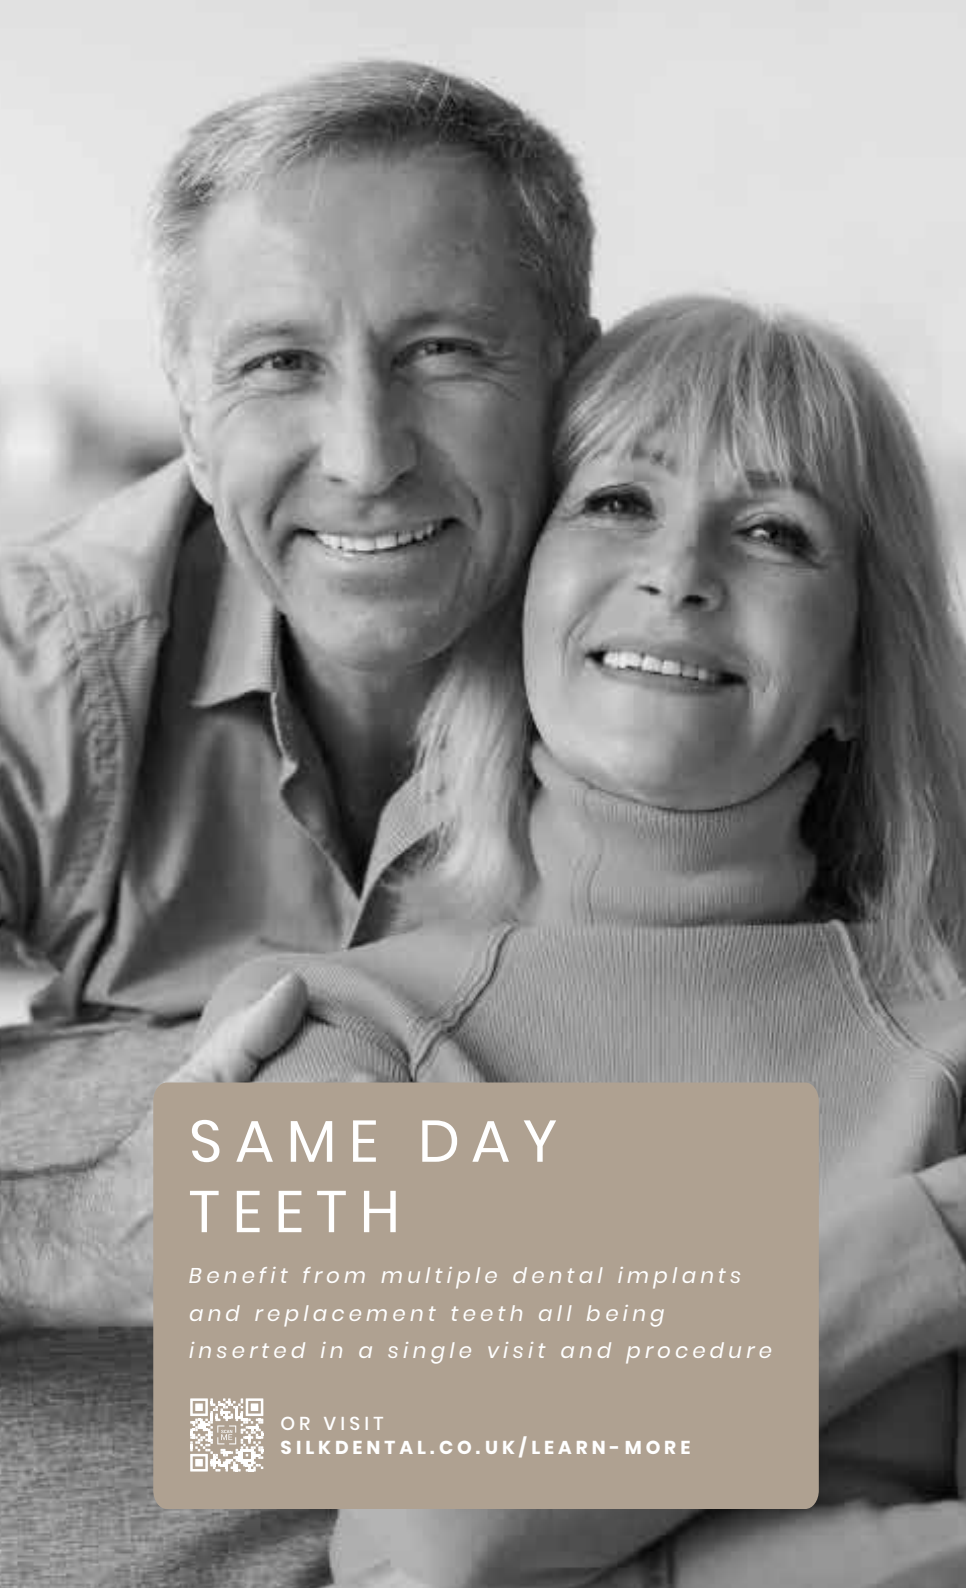

- *Experience dental anxiety or phobia.*
- *Have a low pain threshold or sensitive gag reflex.*
- *Require extensive or multiple dental procedures.*
- *Have had traumatic dental experiences in the past.*

Before proceeding, our team will conduct a thorough assessment to ensure IV Sedation is appropriate for your specific needs

SAME DAY TEETH

*Benefit from multiple dental implants
and replacement teeth all being
inserted in a single visit and procedure*

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

What are Same Day Teeth?

A revolutionary advanced implant procedure which can replace an entire jaw of teeth with a fixed bridge all within **one** appointment. This is possible whether or not you have your own failing teeth or you have a set of dentures.

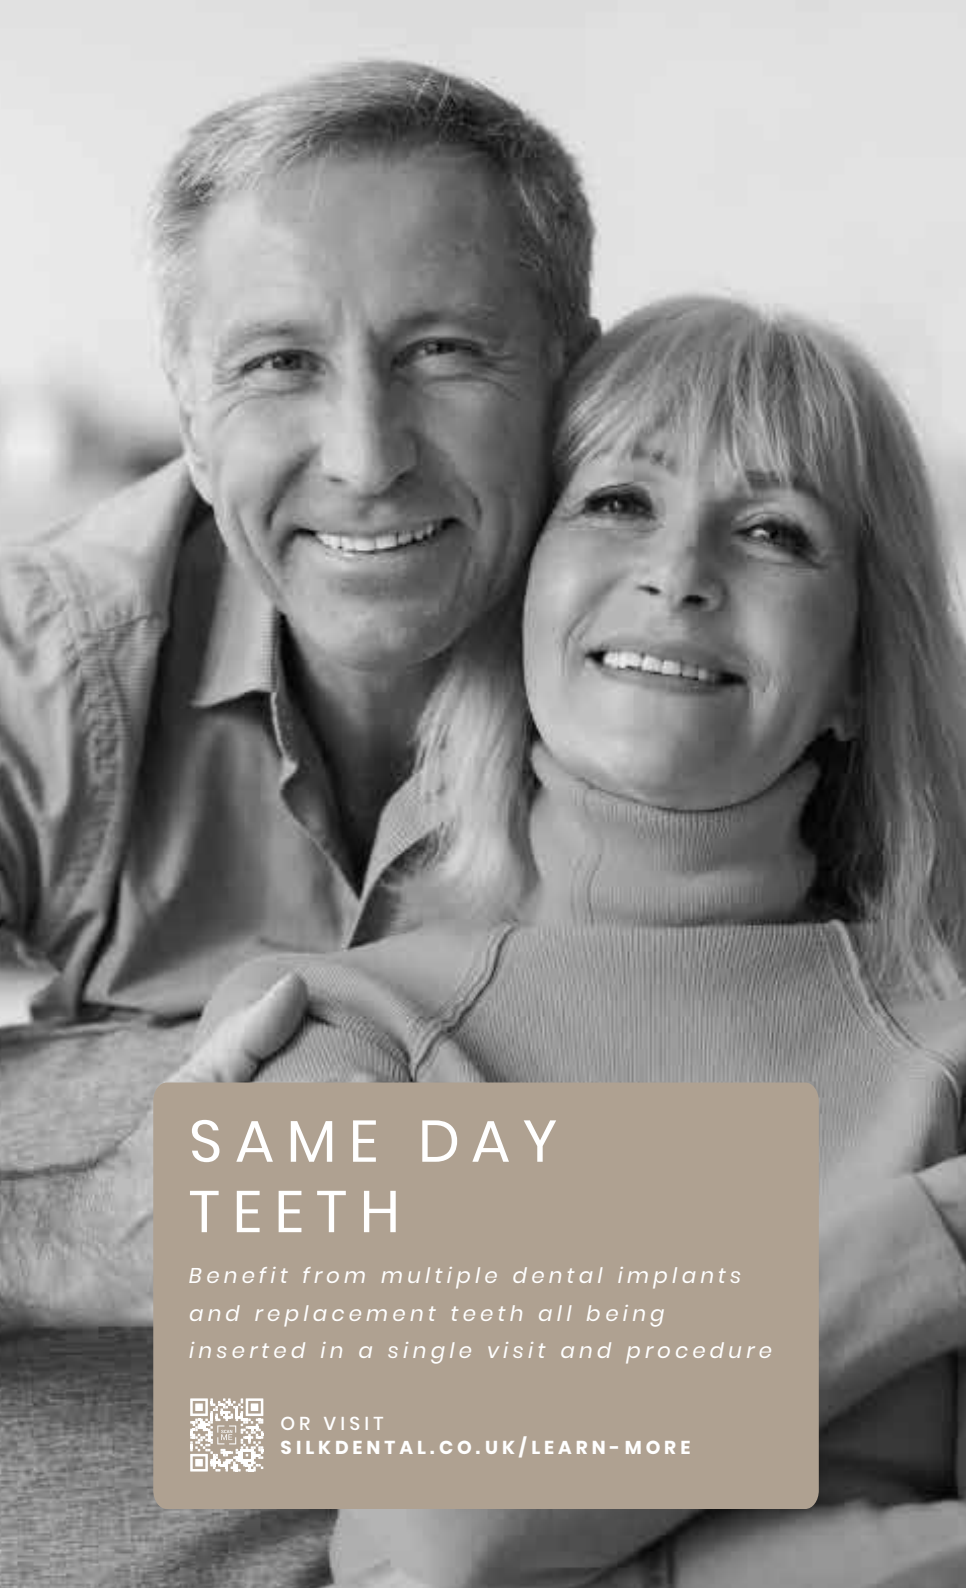

Why choose Same Day Teeth?

At our practice, we understand that time and comfort are paramount when it comes to restoring your smile. That's why we offer Same-Day Teeth, an advanced dental solution that allows you to receive dental implants and fully functional teeth in just one appointment.

Immediate Results | *Traditional dental implant procedures often require multiple visits over several months. With Same-Day Teeth, you can walk out of our clinic with a complete, natural-looking smile after a single visit, eliminating the need for temporary dentures or prolonged waiting periods.*

SMILE MAKEOVER

A beautiful smile means something different to everyone, so we start by listening to your concerns. From here, we create a treatment plan that ticks every box.

What is a Smile Makeover?

A Smile Makeover means something different to every patient. We'll start by listening to your concerns and then consider your oral health. We'll present your treatment options and then use your preferences to create a treatment plan that works for your budget and lifestyle.

What does a Smile Makeover include?

It could include anything from dental implants to orthodontics. It could include crowns and veneers or composite bonding. Your Smile Makeover is unique to you, allowing you to address the imperfections in your smile that you feel are holding you back. A Smile Makeover can also address issues with broken or failing restorations such as bridges or veneers.

Who is suitable for a Smile Makeover?

You should be in good overall health and committed to taking care of your smile. If your oral health isn't where it should be, we'll help you get back on track before starting treatment. Anyone who doesn't feel fully confident with their smile can benefit from a Smile Makeover. And we find that patients who have taken this journey with us are more likely to care for their oral health in the future.

TEETH WHITENING

Professional teeth-whitening penetrates deep into the tooth to flush out deep-set stains. Under dental supervision, teeth-whitening is safe and effective.

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://www.silkdental.co.uk/learn-more)

Boutique Whitening

We use Boutique, a professional, prescription-only whitening solutions that can penetrate the tooth's surface to oxidise and flush out staining particles. This minimises the risk of increased sensitivity or irritation to your teeth and allows for us to offer a guaranteed shading service.

How long before I see results?

After your initial consultation, it will take around two weeks for your custom trays to arrive. Then, you can pick up your teeth-whitening kit from the Dental Practice. If you choose Boutique Whitening Day, you will wear the trays for one hour per day for 3-4 weeks. If you select Boutique Whitening Night, you will wear the trays for up to 4 hours or overnight for 3-4 weeks.

PORCELAIN VENEERS

Porcelain veneers can refine your smile and address multiple aesthetic concerns at once.

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

What are veneers?

Dental veneers are thin, custom-made shells typically made of porcelain that cover the front surface of a tooth and provide several advantages:

Cosmetic Enhancement | *Veneers can be used to improve the appearance of teeth that are discolored, stained, or have other aesthetic imperfections.*

Correction of Irregularities | *Veneers can correct minor dental imperfections such as chipped, cracked, unevenly shaped teeth, or small gaps.*

Minimally Invasive | *Compared to some other cosmetic procedures, veneers require minimal tooth structure removal.*

Customisation | *Veneers are custom-made to match the colour, shape, and size of your natural teeth.*

Durability | *Porcelain veneers are highly durable and can last for many years with proper care. They are resistant to stains and do not discolour easily.*

Quick Results | *The process typically takes only a few dental visits, and the results are often immediate.*

Natural Appearance | *Veneers can look very natural, and it can be difficult for others to distinguish them from your natural teeth.*

Stability | *Veneers can help stabilise and protect teeth with minor damage or wear, preventing further deterioration.*

However, veneers may not be suitable for everyone. A thorough evaluation by a dentist is necessary. Additionally, veneers are typically a cosmetic procedure, and may not address underlying dental health issues, such as decay or gum disease, which would need to be treated separately.

 SILKDENTAL

INVISALIGN

Invisalign is an advanced clear aligner system to straighten your teeth

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

What is Invisalign?

Invisalign is an innovative orthodontic treatment that utilises a series of custom-made, clear aligners to gradually straighten teeth. Unlike traditional metal braces, these aligners are virtually invisible and can be removed for eating, brushing, and flossing, offering a discreet and convenient option for patients seeking to improve their smile.

Benefits of Invisalign

Discreet Appearance | *The clear aligners are nearly invisible, making them a popular choice for adults and teens who prefer a subtle treatment option.*

Comfort | *Made from smooth plastic, Invisalign aligners are less likely to irritate gums and cheeks compared to traditional braces.*

Convenience | *Being removable, they allow for easier eating and oral hygiene, promoting better overall dental health during treatment.*

CONSULTATION

INVISALIGN

Invisalign is an advanced clear aligner system to straighten your teeth

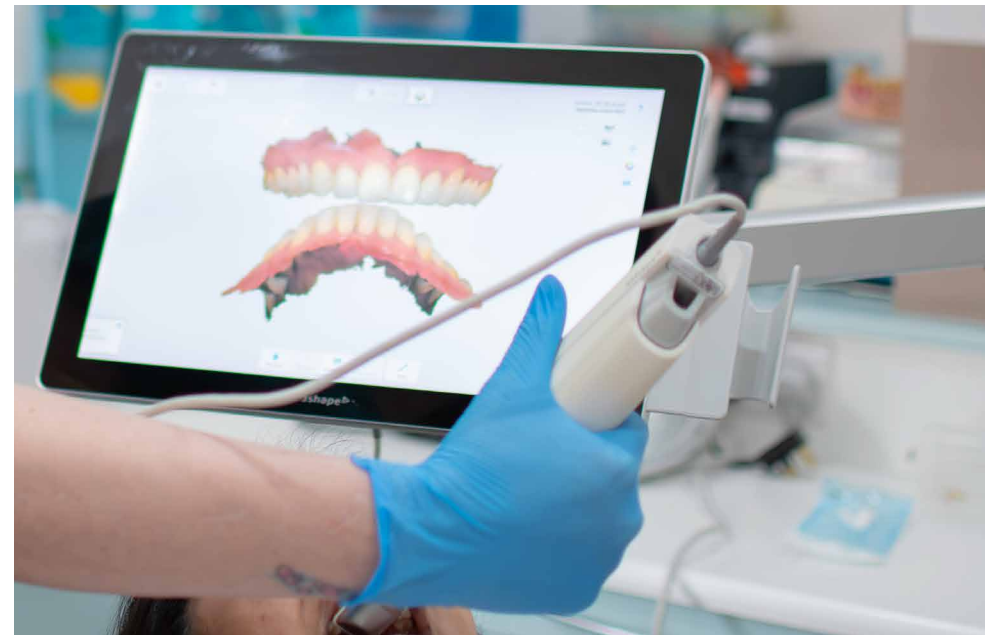

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

Predictable Results | *Advanced 3D imaging technology enables patients to see a virtual representation of their treatment plan and expected outcomes.*

If you're considering orthodontic treatment and desire a solution that aligns with your lifestyle and aesthetic preferences, Invisalign may be the right choice for you. Consult with our dental professionals to determine if Invisalign is suitable for your specific needs.

By gently and consistently applying pressure, Invisalign aligners can move teeth into their desired positions, improving both function and appearance.

 SILKDENTAL

COMPOSITE BONDING

Composite bonding uses a special tooth-coloured resin applied directly to your teeth. This is moulded and shaped into the ideal shape and then set with a UV light, allowing for same-day restorations.

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

What is composite bonding?

Composite bonding is a cost-effective cosmetic dentistry technique that allows for same-day restorations and can fix minor imperfections for a fraction of the cost of treatments such as orthodontics, veneers or crowns.

How does composite bonding work?

Composite resin is matched to the natural tooth colour and then placed directly over the teeth with no preparation of your natural teeth. Your dentist will then shape as required before setting with a UV light. Once set, the resin will look and feel like your natural teeth. However, this is not a permanent restoration.

What is composite bonding used for?

Composite resin can help to conceal a range of aesthetic concerns, including chips, cracks, gaps, discolouration, worn enamel and crooked teeth. If you have minor imperfections and don't want to undergo extensive dental work, this is the ideal cost-effective treatment for you.

 SILKDENTAL

PERIODONTICS

These are specialised treatments and procedures which look to address complex or severe gum and periodontal (supporting structures of the teeth) issues.

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

Why should I consider treatment?

In most cases, treatment and regular maintenance with a dental therapist will stabilise and maintain your gum condition. In a small number of cases, this approach is not effective and more specialised intervention is required. This may be the difference between losing a tooth or teeth or maintaining them for several more years. Advanced periodontal procedures can also be used to move the gum to where it should sit around a tooth or implant, creating that harmonious smile.

What we offer

Full mouth disinfection | *This is a non-surgical deep cleaning procedure performed to remove plaque, tartar, and bacterial toxins from the root surfaces of the teeth and the gum pockets. It is a common treatment for advanced gum disease (periodontitis) and can help resolve non responding areas*

Periodontal Surgery | *Periodontal surgery is a specialized procedure to treat localised advanced gum disease (periodontitis) or address gum and bone-related issues around the teeth and dental implants. It may involve techniques such as gum grafting, bone grafting, pocket reduction surgery, and gum flap surgery.*

Gum Grafting | *This procedure involves taking gum tissue from one area of the mouth and transplanting it to an area with gum recession. Gum grafting helps to cover exposed tooth roots, improve aesthetics, and protect the tooth's supporting structures.*

Crown Lengthening | *Crown lengthening is a procedure to expose more of the tooth's crown by reshaping the gum and bone. It may be done for cosmetic reasons or to prepare a tooth for a dental restoration.*

Guided Tissue Regeneration | *This technique involves placing a barrier membrane between the gum tissue and the bone during periodontal surgery. The barrier encourages the growth of new bone and tissue in areas where they have been lost due to disease.*

ENDODONTICS

This treatment is often the last chance to save a natural tooth. Avoid extraction with timely endodontic treatment.

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

Root canal treatment is often the last chance to save a natural tooth. Avoid extraction with timely endodontic treatment.

What is endodontic treatment?

Endodontics is a branch of dentistry concerned with tooth pulp. When this pulp becomes infected with bacteria, this can lead to acute pain, and the tooth nerve will eventually die. When a tooth dies, extraction and replacement is the only other option.

Endodontics is a conservative treatment that can preserve your natural teeth.

When is root canal treatment needed?

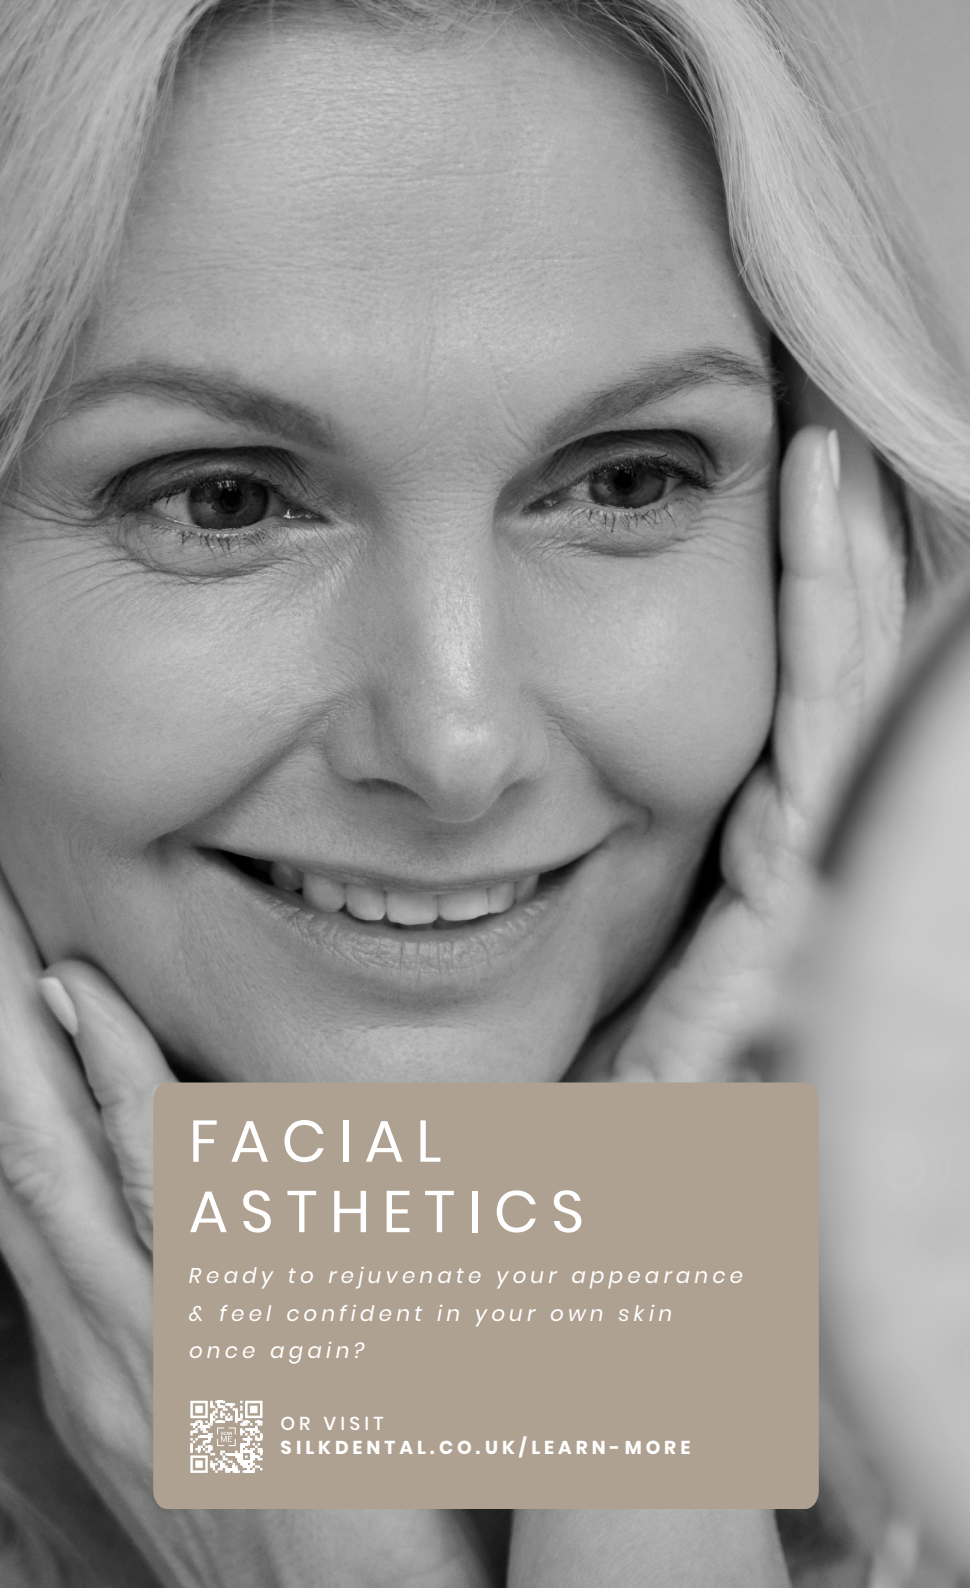

When you have an infection within your tooth root, your choices for treatment are root canal therapy or extraction. An infection in the tooth pulp is usually accompanied with acute pain and occasionally swelling in your cheek or jaw. If the pain goes away temporarily, this doesn't mean the problem is fixed. It is usually an indication that the tooth nerve has died, and the pain can return more severely later.

At Silk Dental Practice, we offer both routine root canal treatment by our skilled general dentists and access to specialist endodontic care for more complex cases. Our specialist endodontist has advanced training and experience in saving teeth that may otherwise be lost, using the latest techniques and technology to ensure the best possible outcomes. Whether your treatment is straightforward or more involved, you can feel confident knowing your care is in expert hands.

FACIAL ASTHETICS

*Ready to rejuvenate your appearance
& feel confident in your own skin
once again?*

OR VISIT
[SILKDENTAL.CO.UK/LEARN-MORE](https://silkdental.co.uk/learn-more)

Our facial aesthetic treatments are designed to subtly enhance your natural beauty and rejuvenate your appearance through anti wrinkle treatments or dermal filler. These safe and effective procedures are carried out by our highly trained professionals, ensuring you're in expert hands every step of the way.

Anti- Wrinkle Injections

Anti-wrinkle injections are a non-surgical cosmetic treatment used to reduce the appearance of fine lines and wrinkles on the face. They work by temporarily relaxing specific facial muscles, preventing them from contracting and forming wrinkles.

Dermal Fillers Dermal Fillers

Dermal fillers are injectable gel-like substances used to restore lost volume, smooth wrinkles, and enhance facial contours.

How Do They Work?

Fillers add volume beneath the skin to plump up wrinkles, folds, and hollow areas. They stimulate collagen production, improving skin structure and elasticity over time. Results are instant and improve over the following days as the filler settles.

Our approach focuses on enhancing your natural beauty rather than creating an artificial or overdone appearance. We work closely with you to understand your goals and achieve a result that complements your features.

FROM ONLY £19.50 PER MONTH

Our practice has an exclusive patient membership scheme that offers a host of benefits including discounted treatment fees and access to priority appointments and enrolment to a worldwide emergency dental emergency scheme. With a range of dental plans to suit different patient needs and budgets, they are designed with a preventative approach to your dental health needs and encourage regular attendance to enable us to spot any problems before they arise.

Join our monthly Membership and enjoy the benefits!

We are investing heavily in the practice to ensure our plan members reap the full benefit of their membership and receive the best clinical care. The main benefits of the membership compared to 'Pay as you go' include:

- *Our member only price list (non members pay 20% more for dental treatment)*
- *Priority appointment times including out of hours, we now offer private appointments after 5pm*
- *Online booking for private patients only allowing you to book whenever convenient to you*
- *Emergency call out and worldwide dental emergency cover allows you to access dental care 24/7, 365 days a week*
- *By spreading the cost of your dental care you can budget better throughout the year*
- *Better oral health, we know plan patients who attend regularly and see the hygienist generally have healthier mouths and gums and any issues are spotted and treated earlier allowing more preventative care*
- *Simplified Dental Care Experience. Unlike traditional dental insurance, our memberships are straightforward, with no claim forms, waiting periods, or coverage limitations. This simplicity reduces administrative hassles and allows you to focus on your dental health*

Flexible Finance Options — Making Your Dental Care More Accessible

At Silk Dental, we believe quality dental care should be accessible to all — without financial stress. That's why we offer flexible finance options to make advanced or cosmetic treatments more affordable.

Benefits of Finance for Our Patients:

Spread the cost over time | Pay for your treatment in easy-to-manage monthly instalments, rather than a single upfront payment.

Interest-free options available | On selected plans, you can spread the cost over several months with 0% interest, meaning you only pay for the treatment — nothing extra.

Quick and simple application | Applications are done securely online and take just a few minutes. Decisions are usually instant.

No hidden fees | All terms are clearly explained upfront, so you'll know exactly what you're paying and when.

Available on a wide range of treatments | Including dental implants, Invisalign®, smile makeovers, crowns, veneers, and more.

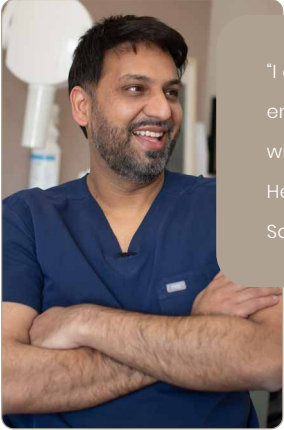

We're Here to Help

If you're considering treatment and want to explore finance options, our team will be happy to talk you through your choices and help find a plan that suits your needs and budget. Just speak to a member of our reception team, or let your dentist know at your consultation — and we'll guide you every step of the way.

Payments are taken once a month and there are no hidden fees

Once your loan starts, payments are collected every month, you can easily change your payment day online if you wish to. You also won't get charged an extra fee for things like repaying early, or even for missing a payment. Once your last payment is through, that's it, you're done.

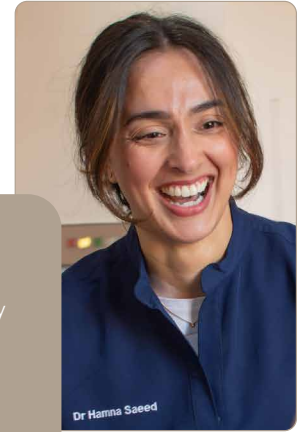

WHAT OUR PATIENT'S SAY....

"I can't praise this dental surgery up enough. Just had root canal treatment with Afzal and he made me so at ease. He is absolutely outstanding at his work! So caring and so professional."

"Really friendly and welcoming practice. Its probably the nicest dentist I've ever been to as they seem to genuinely care. Hassan always takes the time to fully explain any treatment and answer any questions."

"Absolutely amazing experience with Hamna! Had my Invisalign to get all my teeth straight and actually improved the health of my gums along the way."

"Dr Anas and Sophie were amazing and I could not recommend them enough. Thank you so much for my new teeth, I love them. Great experience from start to finish and very helpful throughout the process."

Check out our 240+
5 star Google Reviews

"Gina is a brilliant hygienist, always explaining things very clearly, putting me at ease during the cleaning sessions. She is very thorough in her approach, discusses home cleaning routines in detail."

"I would just like to say a huge thank you to Farhana and her assistant Sophie for their kindness and understanding when I needed to have a tooth extracted recently. They guided me through my options and really put me at ease during my treatment for which I was truly grateful."
